02 ABOUT US

Sunshine Builders & Developers was built on a simple but powerful belief: quality construction and honest business practice should always go hand in hand. Since our inception, we have grown from a local construction firm into an internationally operating real estate group — trusted by clients at home and investors from around the world.

We operate across six countries, bringing global design sensibility and engineering excellence to every project. Our multi-disciplinary team of architects, structural engineers, urban planners, interior designers, and project delivery specialists works seamlessly across borders to ensure that whether your property is in Lahore or London, Dubai or Auckland — it is built to the very highest standard.

Sunshine Builders & Developers serves a diverse client base that includes first-time homebuyers, seasoned property investors, overseas Pakistanis seeking investment back home, and international clients looking to enter emerging South Asian real estate markets.
